Characterization of Fires in Residential Buildings	
Project Title:	Characterization of Fires in Residential Buildings
Project No.:	4918
Project Start:	March 2007
Project End:	March 2008
Project Manager:	Jim Mehaffey

Long-Term Objectives:
 • To provide a comprehensive and practical assessment of the fire risk in residential buildings, including the identification of fire hazards, the assessment of the fire risk, and the development of fire safety measures to reduce the fire risk in residential buildings.
 • To provide a comprehensive and practical assessment of the fire risk in residential buildings, including the identification of fire hazards, the assessment of the fire risk, and the development of fire safety measures to reduce the fire risk in residential buildings.

Key Objectives:
 • To provide a comprehensive and practical assessment of the fire risk in residential buildings, including the identification of fire hazards, the assessment of the fire risk, and the development of fire safety measures to reduce the fire risk in residential buildings.
 • To provide a comprehensive and practical assessment of the fire risk in residential buildings, including the identification of fire hazards, the assessment of the fire risk, and the development of fire safety measures to reduce the fire risk in residential buildings.

No.	Activity	Start Date	End Date
1	Project Initiation	March 2007	March 2007
2	Project Planning	March 2007	March 2007
3	Project Execution	March 2007	March 2008
4	Project Monitoring and Control	March 2007	March 2008
5	Project Closure	March 2008	March 2008

Notes:
 This report was prepared in April 2008 for the FPInnovations Project 4918, "Characterization of Fires in Residential Buildings". The report provides a comprehensive and practical assessment of the fire risk in residential buildings, including the identification of fire hazards, the assessment of the fire risk, and the development of fire safety measures to reduce the fire risk in residential buildings.
